

BAGGAGE MIGRATION COMMUNITY

Meeting #10
16 April 2019

atpco

Disclaimer

The purpose of this meeting is to discuss the coding and processing of airfare-related data by the airline industry, to make the distribution and interpretation of airfare-related data more efficient. It is important that participants conduct themselves in a manner consistent with this conference's industry-wide, pro-competitive mission. Because some, if not all, participants represent companies that compete with one another, we must be careful not to engage in conduct that could be deemed a violation of the antitrust laws.

Accordingly, this meeting will not discuss or take action to develop fares or charges, nor will it discuss or act on remuneration levels of any intermediaries engaged in the sale of passenger air transportation. This meeting also has no authority to discuss or reach agreement on the allocation of markets, the division or sharing of traffic or revenues, or the number of flights or capacity to be offered in any market. Participants are cautioned that any discussion regarding such matters, or concerning any other competitively sensitive topics outside the scope of the agenda, either on the floor or off, is strictly prohibited.

Discussing or reaching any agreement related to these topics could expose meeting participants to liability under the U.S. antitrust laws as well as liability under the competition laws of other jurisdictions around the world.

Airline Baggage Migration Status (11APR19)

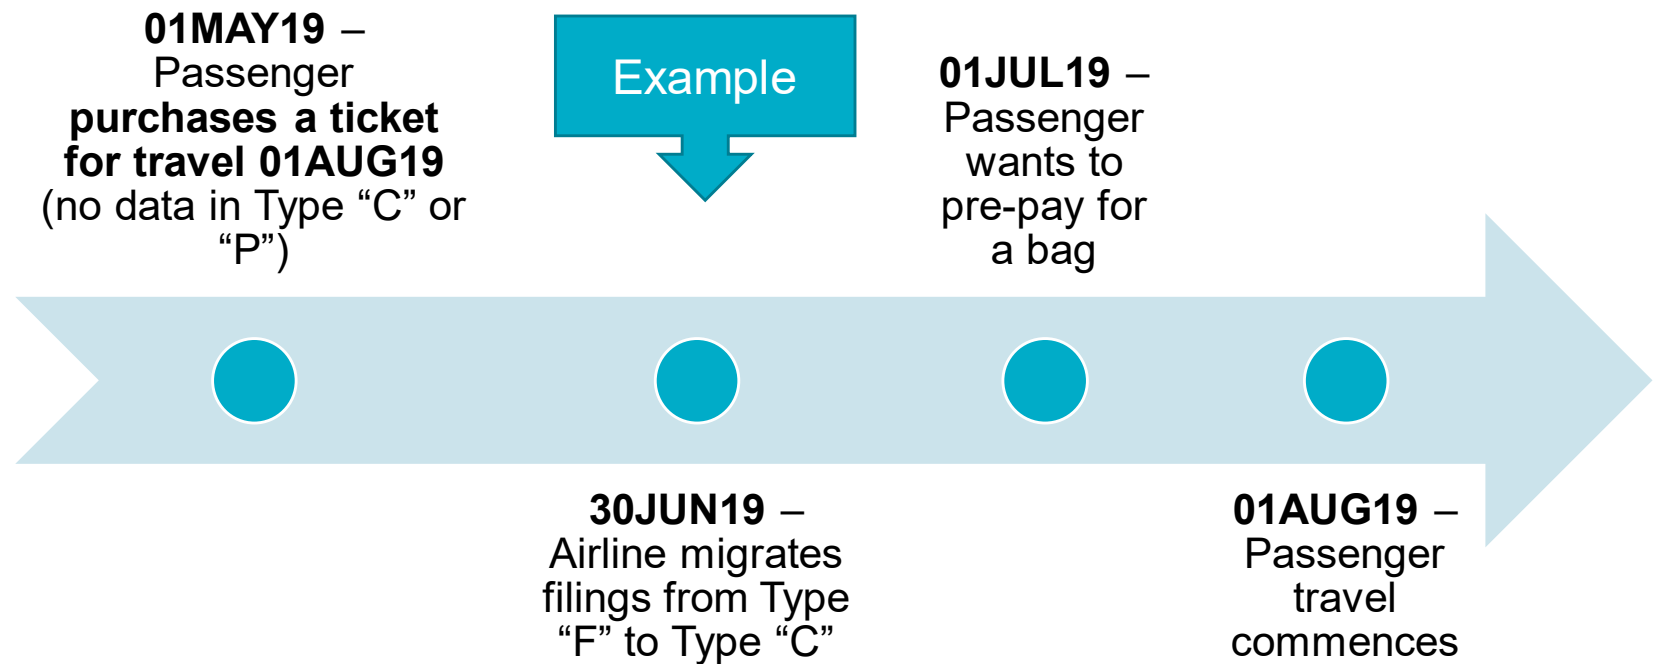

Baggage Migration report with counts available at the Baggage Community web site - <https://info.atpco.net/baggage-migration-community>

Tickets Issued During the Migration

Proposed Option: Processing Hierarchy (for tickets issued prior to migration)

1. Process Type "C" based on ticket date (as per data app)
2. Process Type "P" based on ticket date (as per data app)
3. Process Type "F" based on ticket date

Result: On 01JUL19, process Type "F" data based on data as of 01May19

Migration Check- List

Airline Check-List for Migrating Service Type P to Service Type C and Prepaid/Check-in Indicator

- Advise channels you are ready to begin migration from Type F and P to Type C and gauge their readiness
- Familiarize yourself with Prepaid/Check-in field in the Gold Release
*** Test in the Gold release ***
- Conduct targeted testing in Production (assuming system readiness)
 - Verify results end to end in a test PNR:
 - Verify pricing, check-in and disclosure results are as expected
 - Verify EMD issuance and reporting
- Once satisfied with above result and you and your system providers are ready, start migrating your data on a larger scale
- Refer to the Baggage Data Migration Guide for efficiencies with analysis and filings

Other Changes

Before Migration of Type P to Type C Can Begin

- All applicable Sub codes must be in Services Record S5 under Service Type C before migrating Service Type F/P data to Type C via Optional Services Upload or manual updates in Optional Services Application

Where Does Type C Differ from Type F?

- Any reference to 'Sector' under the 'Sector/Portion/Journey' field in Service Type F data must be changed to 'Portion or Journey' before uploading the data into Service type C because 'Sector' value is not applicable under service type C
- Consider Mixed Cabin Application (default is "all sectors")

Branded Fares and Migration of Service Types

- Review Branded Fares Features table and ensure that Service Types and sub-codes are aligned with any changes in Optional Services Baggage

Review your current Strategies

- Review your existing Baggage policy and ensure the coded sequencing hierarchy regarding the 'prepaid and/or check-in/disclosure' data will produce the expected results per your policy

Filing Actions

Filing Actions if a Channel is not Ready

- Before airlines start migrating any data, verify that distribution channels are ready by viewing the [Subscriber Readiness Matrix](#) in the ATPCO Customer Center.
- If a single distribution channel is not ready to process the Prepaid/Check-in Indicator:
 - File a Security Table for point of sale defining all distribution channels except for the channel not ready
 - Verify with the channel other ways to protect existing data

Baggage Community – Future Topics

Baggage Community Topics – moving forward...

- Continued review of the migration status
- Understand system migration plans
- Australian Government – defining baggage charges based on sales date
- Clean up Pet Sub Codes in Type C
 - ATPCO has an action item to get the usage counts for how often the Pet Sub Codes have been used.
- Allow Weight & Size Table for other sub codes (e.g. 0CC)
